Continental cut-off machines cut pipe and tube quickly and cleanly using the unique rotary cut-off method. This method and our machines have a number of benefits over other processes:

- Because the blade only passes through the tube’s wall thickness, not the entire diameter, cuts are much faster than band saws, cold saws, etc.
- No chips are created and usually no coolant is required, so your parts and the work area stay clean. No chips, No mess, No hassle!
- The cut is smooth and clean with minimal burrs, so secondary de-burring operations can often be eliminated.

**Model 1G Grinder**

Footprint: 13-1/2” X 28”

Overall height: 16”

Weight: 160 lbs.

---

**Model 1G Cut-off Blade Grinding Machine**

Complete with 3/4HP (115 volt, 1 phase, 60 Hz) motor

- Sharpen dull blades, increasing productivity and reducing costs
- Convenient and economical
- Sharpen blades up to 8-1/2” diameter
- Easy to set up and use

---

**Accessories**

Model 5710
- 6” diameter grinding wheel

Model 5959
- Cut-off blade honing stone
