Continental cut-off machines cut pipe and tube quickly and cleanly using the unique rotary cut-off method. This method and our machines have a number of benefits over other processes:

- Because the blade only passes through the tube’s wall thickness, not the entire diameter, cuts are much faster than band saws, cold saws, etc.
- No chips are created and usually no coolant is required, so your parts and the work area stay clean. No chips, No mess, No hassle!
- The cut is smooth and clean with minimal burrs, so secondary de-burring operations can often be eliminated.

Visit our website at www.continentalcutoff.com to learn more about rotary tube cutting!

**Capacity:**
- 1/4” to 2” OD X 5/32” wall

**Cutting times achieved for mild steel tubing:**
- 1/2” OD X 20 GA wall . . . 3 seconds
- 1” OD X 16 GA wall . . . .6 seconds
- 2” OD X 22 GA wall . . . .8 seconds
- 2” OD X 5/32” wall . . . .11 seconds

**Includes:**
- Cutter block assembly
- Standard cut-off blade
- Manual length gauge

**Model 2B Hand-operated Cut-off Machine**

Complete with 1HP (115VAC, 1 phase, 60 Hz) motor with manual starter, Model 442 manual length gauge assembly, choice of one standard cutter block assembly and standard cut-off blade

- Best use: lower production applications or short production run applications
- Simple, fast setup - easy to learn
- Inexpensive, resharpenable blades
- Chipless rotary cut is clean, smooth and fast

Visit our new website at www.continentalcutoff.com to learn how Continental’s rotary cut-off machines can improve your tube cutting operation.
