

## Series 200 Infeed Tube Support Tables and Cutter Blocks

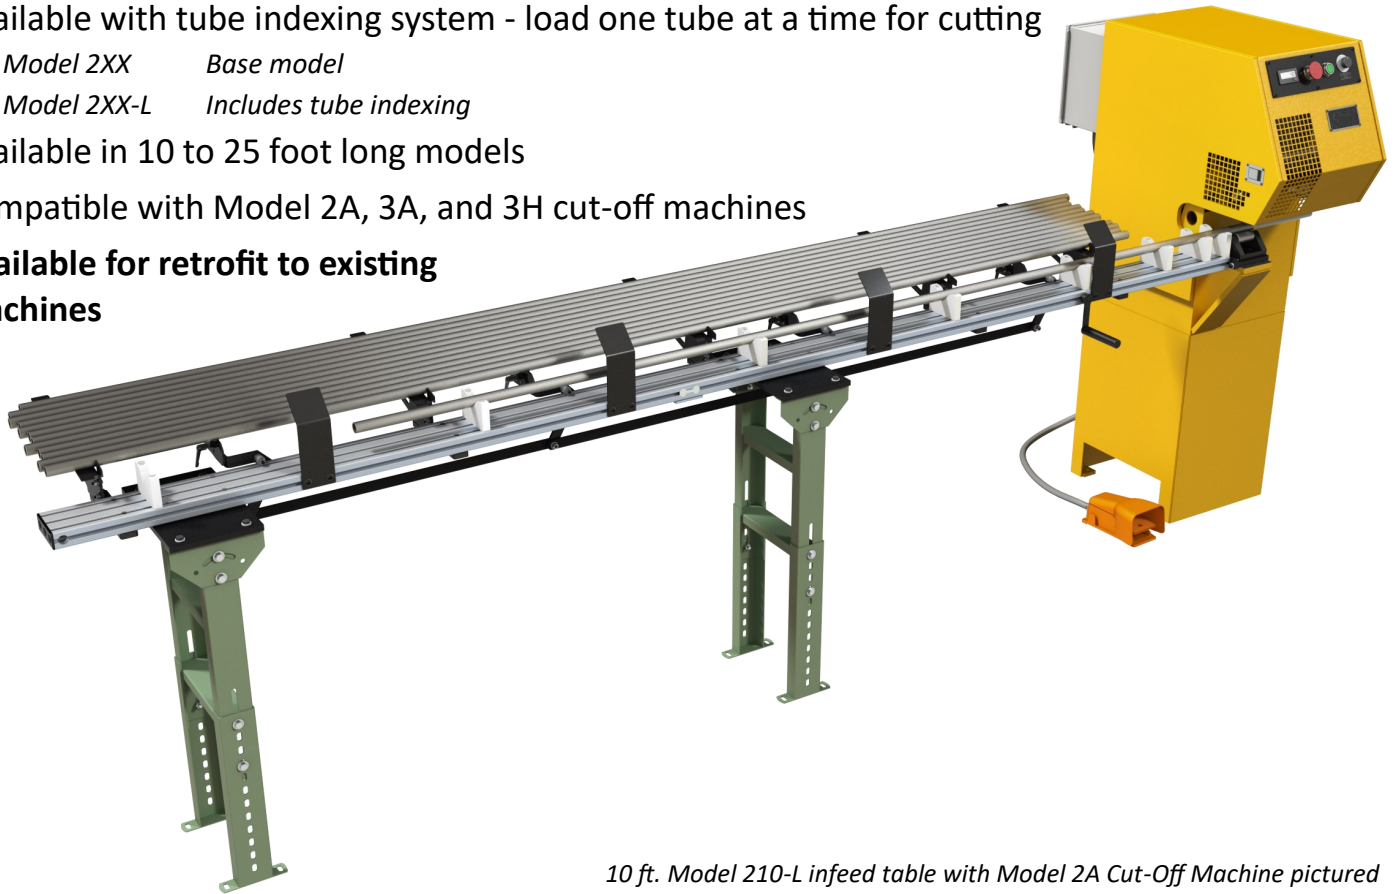

The **Series 200** tube support tables were designed to be used where the complexity and expense of an automatic tube feeding system cannot be justified. They permit an operator to safely load tube stock onto and manually feed it in to the cut-off machine.

- Handles a range of tube sizes with no need for adjusting: 1/4" to 3"
- Non-marring tube supports prevent damage to tube stock during cutting
- Standard storage racks included (1" tube pictured)
- Available with tube indexing system - load one tube at a time for cutting

*Model 2XX      Base model*

*Model 2XX-L      Includes tube indexing*

- Available in 10 to 25 foot long models
- Compatible with Model 2A, 3A, and 3H cut-off machines
- **Available for retrofit to existing machines**

*10 ft. Model 210-L infeed table with Model 2A Cut-Off Machine pictured*

The **Series 200** cutter blocks work in conjunction with the tube support tables. They provide support and alignment directly under the cut-off machine's blade during cutting. Each cutter block handles a specific range of tube sizes and they're easily swappable for fast change-overs.

- 4 size ranges available: 1/4" to 3/8", 3/8" to 1", 1" to 2", and 2" to 3".  
*(2 to 3" size is for Model 3A/3H applications only)*
- Each size available in camroll (short) or full support depending on application.
- Compatible with Model 2A, 3A, and 3H cut-off machines
- **Available for retrofit to existing machines**

## Series 250 Outfeed Tube Support Tables

The **Series 250** tube support tables were designed to be used where the complexity and expense of an automatic tube feeding system cannot be justified. They permit an operator to accurately gauge cut lengths and safely support tube during cut off.

- Handles a range of tube sizes with no need for adjusting: 1/4" to 3".
- Adjustable, non-marring tube supports prevent damage to tube stock during cutting and can be adjusted to support any cut length.
- Includes retracting length gauge with scale (1/16" graduations).
- Available for cut lengths of 3 to 20 feet.
- Compatible with Model 2A, 3A, and 3H cut-off machines.
- **Available for retrofit to existing machines.**

3 ft. Model 250-3-2A outfeed table with Model 2A Cut-Off Machine pictured

The **Series 250** outfeed tables are also available with an optional Digital Readout (DRO) upgrade. This option adds a battery-powered digital display to the length gauge, making setting cut lengths easier, faster, and more accurate.

**Available for retrofit to existing 250 Series tables.**
